PROFESSIONAL SUMMARY

Full-Stack Engineer with 2+ years of software development experience in building and maintaining web applications using React.js, Node.js, JavaScript, and REST APIs. Hands-on experience with MySQL, TiDB, database integration, application security, and Microsoft Azure services for data storage and deployment. Experienced in collaboratively developing frontend and backend features, troubleshooting application issues, and taking full-stack projects from development through deployment. Microsoft Azure Fundamentals (AZ-900) certified.

TECHNICAL SKILLS & CERTIFICATIONS

- **Languages**: Python, JavaScript (ES6+), SQL, Data Structure & Algorithms (DSA)
- **Frontend**: React.js, React Hooks, State Management, Redux, Context API, component-based UI
- **Backend**: Node.js, Express.js, REST API development, API integration, Knex.js
- **Databases**: MySQL, TiDB, PostgreSQL, MongoDB, relational schema design, SQL
- **System Design**: High-Level Design (HLD), Low-Level Design, API Design, Fault Tolerance, Microservices Architecture.
- **Cloud & DevOps**: Microsoft Azure services, Azure Storage, Git, GitHub, GitHub Actions, Linux
- **Development Tools**: Postman, Swagger, authentication, authorization, security middleware, rate limiting, logging, debugging, troubleshooting

WORK EXPERIENCE

Software Engineer | LTIMindtree
Hyderabad | **Aug 2024 – Present**

- Develop and maintain full-stack application features using React.js, Node.js, and MySQL as part of a software engineering team.
- Build and integrate React.js interfaces with backend business logic and REST APIs to support application workflows.
- Use Microsoft Azure services for application data storage and deployment-related workflows.
- Collaborate with team members to debug and test applications, troubleshoot issues and support application releases.
- Use Git and GitHub workflows to manage code changes and coordinate development activities with the team.
- Work with MySQL-backed application data to support data retrieval and application requirements.
- Validate API behaviour using development and API-testing tools, investigate defects, and troubleshoot issues across application components.
- Support application deployment and configuration using Microsoft Azure Services, helping ensure application components and required data storage are available in the target environment.

PROJECTS

Know India – Full-Stack Tourism Information Platform **GitHub | Live**
Tech Stack: JavaScript, React.js, Node.js, Express.js, TiDB

- Built and deployed a full-stack tourism information platform using JavaScript, React.js, Node.js, and Express.js.
- Used TiDB to store structured tourism information and support application data workflows.
- Designed data structures for destinations, categories, images, and users, and implemented CRUD workflows and REST APIs for content management.
- Developed an interactive map-based destination discovery interface and an administrative dashboard to manage destinations, categories, images, and user-generated content.
- Implemented authentication and authorization, input validation, security middleware, rate limiting and application logging to protect API endpoints and support troubleshooting.
- Integrated an embedded Google Map to display selected destinations and provide links to open locations in Google Maps and get directions.
- Added quick links to find nearby hotels, hospitals, pharmacies, and police services through Google Maps.
- Validated APIs, worked with database queries, debugged applications issues and supported deployment and ongoing maintenance.

EDUCATION

- **B. Tech, Information Technology – Bengal Institute of Technology, Kolkata**
  August 2019 - June 2023 | CGPA – 8.6

CERTIFICATION

- **Microsoft Azure Fundamentals (AZ - 900)**
- **Azure Administrator Associate (AZ - 104)**
